FICTIONAL TRAINING CONTENT - Estee Lauder Companies GSM Copilot training, October 2026. All people, suppliers, prices, and documents are invented.

Decision Governance Standard

Owner: GSM Governance
Effective: 1 September 2026

- A supplier recommendation must distinguish facts, assumptions, and proposals.
- An open high responsible-sourcing risk cannot be represented as closed without written confirmation from the responsible-sourcing owner.
- A pending technical test cannot be represented as passed.
- A provisional capacity hold is not a purchase commitment.
- The decision record must include owner, due date, and evidence location for every condition.
- After the decision, GSM Strategy owns the final decision record in the SharePoint Decision Records library and must link it to supporting evidence.
