Subject: Project Luminous supplier recommendation

I recommend a controlled dual-source plan for the 1.2 million-unit launch. Aurelia would supply 850,000 units and Northstar would supply 350,000 units. This reduces continuity risk while Aurelia completes the remaining technical and responsible-sourcing conditions.

The plan adds approximately $96,000 and reduces continuity risk. Both suppliers are fully approved, and the alternate capacity is secured.

We need a decision before the Northstar capacity hold expires Thursday at 3:00 PM Eastern.
